But them and try various and diverse means of a thought them and try various and diverse means of a thought them and try various and diverse means of a thought the success of the schools of t

AN OFT TOLD TALE, BUT NONE THE WORSE OF REPEATING.

The Philadelphia Press probably will be accused of waving the bloody shirt because it calls attention to the fact that the solid south rules the democratic party and the democratic party rules the nation. There are thirteen states that can be counted on to give democratic majorities. These are Alabama, Mississippi, Arkansas, Louisiana, Texas, North Carolina, South Carolina, Georgia, Florida, Virginia, Tenneasee, Oklahoma and Kentucky.

These thirteen states sent to the house of representatives 116 democratic members. A majority of the house is 218, so these states have a majority of that majority. These states give twenty-six democratic senators. A majority of the senate is forty-nine. The party caucus dictated the legislation and the twenty-six senators from the Southern States were a majority of the majority.

Dotthed up tariff law and undoubtedly would do so but for one thing. They are not sure when 12.2 and the it as a confession that the democrate are wrong. But as the cash the republicans are right or an acknowledgement that the democrate are wrong. But as the cash the republicans are right or an acknowledgement that the democrate are wrong. But as the cash the republicans are right or an acknowledgement that the democrate are wrong. But as the cash the republicans are right or an acknowledgement that the democrate are wrong. But as the cash the republicans are right or an acknowledgement that the democrate are wrong. But as the cash the republicans are right or an acknowledgement in the treasury becomes less and less the free that the democrate are wrong. But as the cash the republicans are right or an acknowledgement that the democrate are wrong. But as the cash the republicans are right or an acknowledgement that the democrate are wrong. But as th

from the Southern States were a majority of the majority.

What does the South get in return for these votes? These states furnish the chairmen of all the important committees of both branches of congress. There is but one exception, that of the appropriations committee of the house, which is headed by a New York democrat. All of the measures dealing with tariff, business, banking, currency, judiciary, military and naval affairs, public buildings, finance, rivers and harbors, and like important subjects are in the hands of the South.

What proportion of the burdens laid by con-

hands of the South.

What proportion of the burdens laid by congress on the country does the South bear? These thirteen states turned into the treasury considerably less than \$2.000,000 of personal income tax document, at present, in belonging to a party so out of the \$41,000,000 collected from the country. Of the corporation income tax, they together paid \$3,500,000 out of the \$39,000,000 collected. The states which framed and passed these taxation laws paid \$4½ per cent of the personal and less than 9 per cent of the personal and less than 9 per cent of the personal and two-thirds of the corporation income tax. These are New York, Pennsylvania, Illinois, New Jersey, Ohio, Massachusetts, Michigan, Connecticut and Rhode Island. This new taxation was faid to offset the decrease in the customs rev-

enues brought about by lowering the tariff. These nine states were hardest hit by the tariff changes. But they are called upon to bear the additional burden of providing the revenue made necessary by the taking away from them of their tariff expression.

SENDING MONEY AWAY FROM HOME IS A MOST RUINOUS POLICY.

Carbon county's board of education is sending Carbon county's board of education is sending out of town for its printing for high school use at least. About two weeks ago bids were asked for from The Sun and also from the News-Advocate on five different forms of jobs in five hundred lots each, and also in one thousand lots each. The bid of The Sun on the five hundred lots was less than forty dollars and on the thousand lots it was less than fifty dollars. The bid of the News-Advocate, we are told by the gentleman who solicited the bids, varied from The Sun but a few cents on each piece of work. After the bids had been submitted to the county school board the work was ordered from a Salt Lake City house.

board the work was ordered from a Salt Lake City house.

The loss of this work, which by all rights should have been kept at home, will neither make or break The Sun or the News-Advocate. What The Sun complains of is the fact of sending away from home for that which rightfully should be kept among local people. The two newspapers at Price have their money invested here, are taxpayers and are giving employment to the heads of seven or eight families that spend their wages among local people, contribute to local affairs and have in the past donated hundreds of columns of newspaper space to the schools of the county. Nothing of this kind will come back from the Salt Lake City concern.

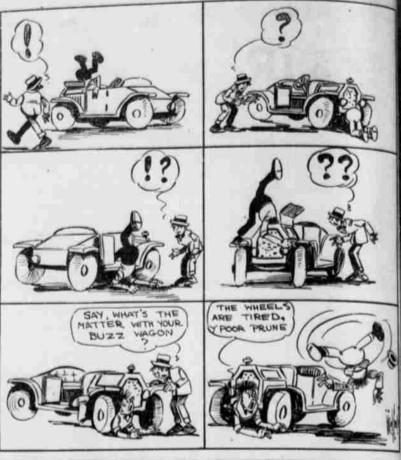

Work of the same class is done as cheaply at Price as it is at Salt Lake City or elsewhere in the state. It is true there are cheap concerns everywhere, but does or will it pay the school board in the long run?

The only democratic newspaper of Washington, D. C., the Post, admits that the free trade deficit by the close of this year is bound to be "at least a hundred million dollars." The average mind may not, probably will not, grasp just what that means. It amounts approximately to \$333,000 per day or \$2,000,000 per week. To express it another way, free trade is each week running the government in debt about a dollar for each man, woman and child in the intermountain region. Just now the government is running behind much faster than that, but the treasury wreckers hope to cut down the present million-dollar-a-day deficit when they again begin collecting income taxes, but even that source of revenue will be smaller, for the good reason that incomes are smaller. Wonderful is the difference between protection and free trade. Under republican and protective management the cry was, "too much money in the treasury." Oh, what a difference in the morning!

Democrats would like mightily to revise their botched up tariff law and undoubtedly would do so but for one thing. They are not sure whether the people would take it as a confession that the republicans are right or an acknowledgement that the democrats are wrong. But as the cash in the treasury becomes less and less the free traders are bound to see that something must be done and are likely to conclude to eat a big mess of crow, regardless of the effect on their innards.

There are the best of indications that, before the Georgia courts and juries are done with in-vestigating the Frank case, they will prove be-yond a reasonable doubt that the general im-pression of Frank having been murdered by a mob is all wrong.

JUST WHY THE BUZZ WAGON WOULDN'T RUN.
